Cleanup Construction Activities

The construction schedule continues to follow the times for high tides. The active work sites are in shallow waters near the shore, so higher tides are needed to float the equipment. This work includes the movement of barges.

The high tides during the week of February 10 occur in the early mornings. Some work this week will be done outside normal hours (7 a.m. to 7 p.m. Monday through Friday and 9 a.m. to 7 p.m. on Saturdays). **The schedule will vary but work may start as early as 3 a.m.** Please see LDWG.org for the most up-to-date information.

For questions or concerns, you can reach our team at info@ldwg.org or 1-888-561-LDWG (1-888-561-5394). Please note that in-water construction activities are tide and weather-dependent. All schedules are subject to change.

Weekly Environmental and Community Report for the week of January 27

You may view the weekly report and other previous weekly reports by clicking the link below.

What to expect during the week of February 10

Dredging of contaminated sediments is completed for Construction Season 1. The remaining cleanup activity is to continue backfilling (placing clean material) in Sediment Management Area (SMA) 6.

The final surveys of dredged and backfilled SMAs 2, 3, 4, 8, 11B, and C1, will be evaluated for completeness. See the map of cleanup areas linked below.

What to expect during the week of February 17

During the week of February 17, backfilling will continue in SMA 6. To complete this last area, the work will continue through February 28.

Map of cleanup areas

Backfilling must be done during high tides which may require working before sunrise or in snowy conditions (Photo credit: Geosyntec, week of February 3, 2025).
