Cleanup Construction Activities

All construction is done in Sediment Management Areas (SMAs) 2A, 2B, 3, 4, 6, 8, 11B, and C1 including installation of the replacement tribal fishing pile in SMA 6. We are now focused on completing work for the SMA 9 sheet pile wall (see photo below) followed by construction demobilization. Please see the map of cleanup areas linked below.

Some work the week of March 3 will be done outside normal hours (7 a.m. to 7 p.m. Monday through Friday and 9 a.m. to 7 p.m. on Saturdays). The work schedule for the sheet piles at SMA 9 (on shore only) is affected by the tides. **The schedule will vary but work at SMA 9 may extend to midnight.**

For questions or concerns, you can reach our team at info@ldwg.org or 1-888-561-LDWG (1-888-561-5394). Visit LDWG.org for the most up-to-date information.

What to expect during the week of March 3

The remaining construction activity is to finish work for the SMA 9 sheet pile wall. This includes working from shoreline property, where the contractor will fill the space between the original and new sheet pile walls with concrete. The concrete placement may extend beyond the normal hours because it must be done during low tide.

Construction Season 1 wrap-up activities

In-water cleanup activities are complete. Demobilization of the construction equipment will occur in March. Demobilization activities are expected to occur at the Contractor's (Pacific

Pile and Marine) waterfront property along South Riverside Drive. Demobilization will include removing equipment and supplies from the barges.

Map of cleanup areas

Preparing for the finishing work of SMA 9 bulkhead wall system (sheet pile wall) with the installation of concrete reinforcing rebar (Geosyntec Consultants, week of February 24, 2025).
