Cleanup Construction Activities

Season 2 construction in the upper reach, the southernmost two miles of the Lower Duwamish Waterway Superfund site, will continue through February 2026. Season 2 construction will occur on weekdays and Saturdays, with **work taking place during both daytime and, when needed, nighttime hours**. Work hours vary based on factors such as tides and the type of work being conducted (e.g., dredging or placing clean material). Work will be coordinated with Tribal fishing.

Please note that in-water construction activities are dynamic and weather-dependent. All schedules are subject to change. Visit LDWG.org for the most up-to-date information.

If you have questions or concerns, you can reach our team at info@ldwg.org or 1-888-561-LDWG (1-888-561-5394).

Environmental and Community Report for the Week of November 17

Environmental & Community Report

With oversight from the EPA, we are working to minimize the impact of construction on those who work, live, and spend time along the Duwamish Waterway. Stay informed about environmental monitoring and construction activities by viewing our weekly report linked above.

Overnight South Park Bridge Closures December 1 and 2

The South Park Bridge will be fully closed to all vehicles and pedestrians on the nights of Monday, December 1, and Tuesday, December 2, from 7 p.m. to 6 a.m., while crews place clean material under the bridge. It will reopen at 6 a.m. on Tuesday and Wednesday, with closures ending the morning of Wednesday, December 3.

During this time, the bridge will be in a raised position. This allows crews to place clean material under the bridge in locations where they dredged earlier in the construction season. Unlike during daytime construction, recreational vessels will not be permitted to pass beneath the South Park Bridge during this nighttime work.

During this time, you may hear noise from construction equipment and see lights needed for safe work. Please reach out to the Cleanup Outreach Team if you have any concerns at 1-888-561-5394.

King County Metro 60, which travels over the South Park Bridge, will be rerouted during the hours of the bridge closures. King County Metro will provide Route 60 reroute information on the Metro Services Advisories page:

[Kingcounty.gov/metro/alerts](https://kingcounty.gov/metro/alerts).

Sign up for King County Road Alerts for text or email updates:

kingcounty.gov/en/dept/local-services/transit-transportation-roads/roads-and-bridges/road-alerts.

Closures are also announced by King County Road Services' My Commute Platform:

[Kingcounty.gov/MyCommute](https://kingcounty.gov/MyCommute)

The LDWG team is coordinating closely with King County Road Services and the local community to keep everyone informed about this and any future construction-related closures. Thank you for your patience as we complete this work.

What to Expect During the Week of December 1

Cleanup dredging activities will occur at sediment management area(SMA) 9 and will occur during the daytime, between 6:30 a.m. and 6 p.m.

In addition, starting December 1 and continuing through December 6, crews will be working at night to conduct cleanup activities. This includes placing clean material in the completed dredge area of **SMA 14D**, near the South Park Bridge (see map linked above) and dredging at **SMA 11A**, south of Duwamish River People's Park. Nighttime work hours will be from 7 p.m. to 6 a.m. Nighttime work may continue into the week of December 8. On two nights, the nighttime work requires closure of the South Park

Bridge (see above).

During this time, you may hear noise from construction equipment and see lights needed for safe work. Please reach out to the Cleanup Outreach Team if you have any concerns (1-888-561-5394).

What to Expect During the Week of December 8

Cleanup activities will take place at SMAs 11A and 15A and will occur during the daytime, between 6:30 a.m. and 6 p.m.

Barge of clean sand used to cover the dredged areas in SMA 14A, 14C, and 14D. (Geosyntec, November 24, 2025)

Barge of contaminated sediment from SMA 15A as the construction team nears the completion of required dredging. (Geosyntec, November 25, 2025)
