### Cleanup Construction Activities

Season 2 construction in the upper reach, the southernmost two miles of the Lower Duwamish Waterway Superfund site, will continue through February 2026. Season 2 construction will occur on weekdays and Saturdays, with **work taking place during both daytime and, when needed, nighttime hours**. Work hours vary based on factors such as tides and the type of work being conducted (e.g., dredging or placing clean material). Work will be coordinated with Tribal fishing.

Please note that in-water construction activities are dynamic and weather-dependent. All schedules are subject to change. Visit [LDWG.org](http://LDWG.org) for the most up-to-date information.

Despite high flows from recent storms, we are continuing our cleanup activities in the upper reach of the Lower Duwamish Waterway while maintaining the safety of the crews and environmental protections.

If you have questions, or concerns, you can reach our team at [info@ldwg.org](mailto:info@ldwg.org) or 1-888-561-LDWG (1-888-561-5394).

*Please note our regular email newsletters for Friday, December 26, and Friday, January 2 will be sent on Monday, December 29, and Monday, January 5.*

### Environmental and Community Report for the Week of December 8

[View Last Week's Environmental and Community Report](#)

With oversight from the EPA, we are working to minimize the impact of construction on those who work, live, and spend time along the Duwamish Waterway. Stay informed about environmental monitoring and construction activities by viewing our weekly report linked above.

## What to Expect During the Week of December 22

Cleanup dredging activities will occur at sediment management area (SMA) 16. We will be placing clean material in SMA 7, where dredging activities have been completed. All work will occur during the daytime, between 6:30 a.m. and 6 p.m. The construction contractor will not perform cleanup work on December 24 and 25, in observance of the holiday.

## What to Expect During the Week of December 29

Cleanup activities will take place at SMAs 7 and 16 and will occur during the daytime, between 6:30 a.m. and 6 p.m. The construction contractor will not perform cleanup work on December 31 and January 1, in observance of the holiday.

*High river flows from heavy rainfall caused debris from upstream to move downriver. This floating debris near and within the work area requires the dredge barge, supporting tugboats, and crew boats to make adjustments to their position. (Geosyntec, December 15, 2025).*
